

Databricks Feature Store

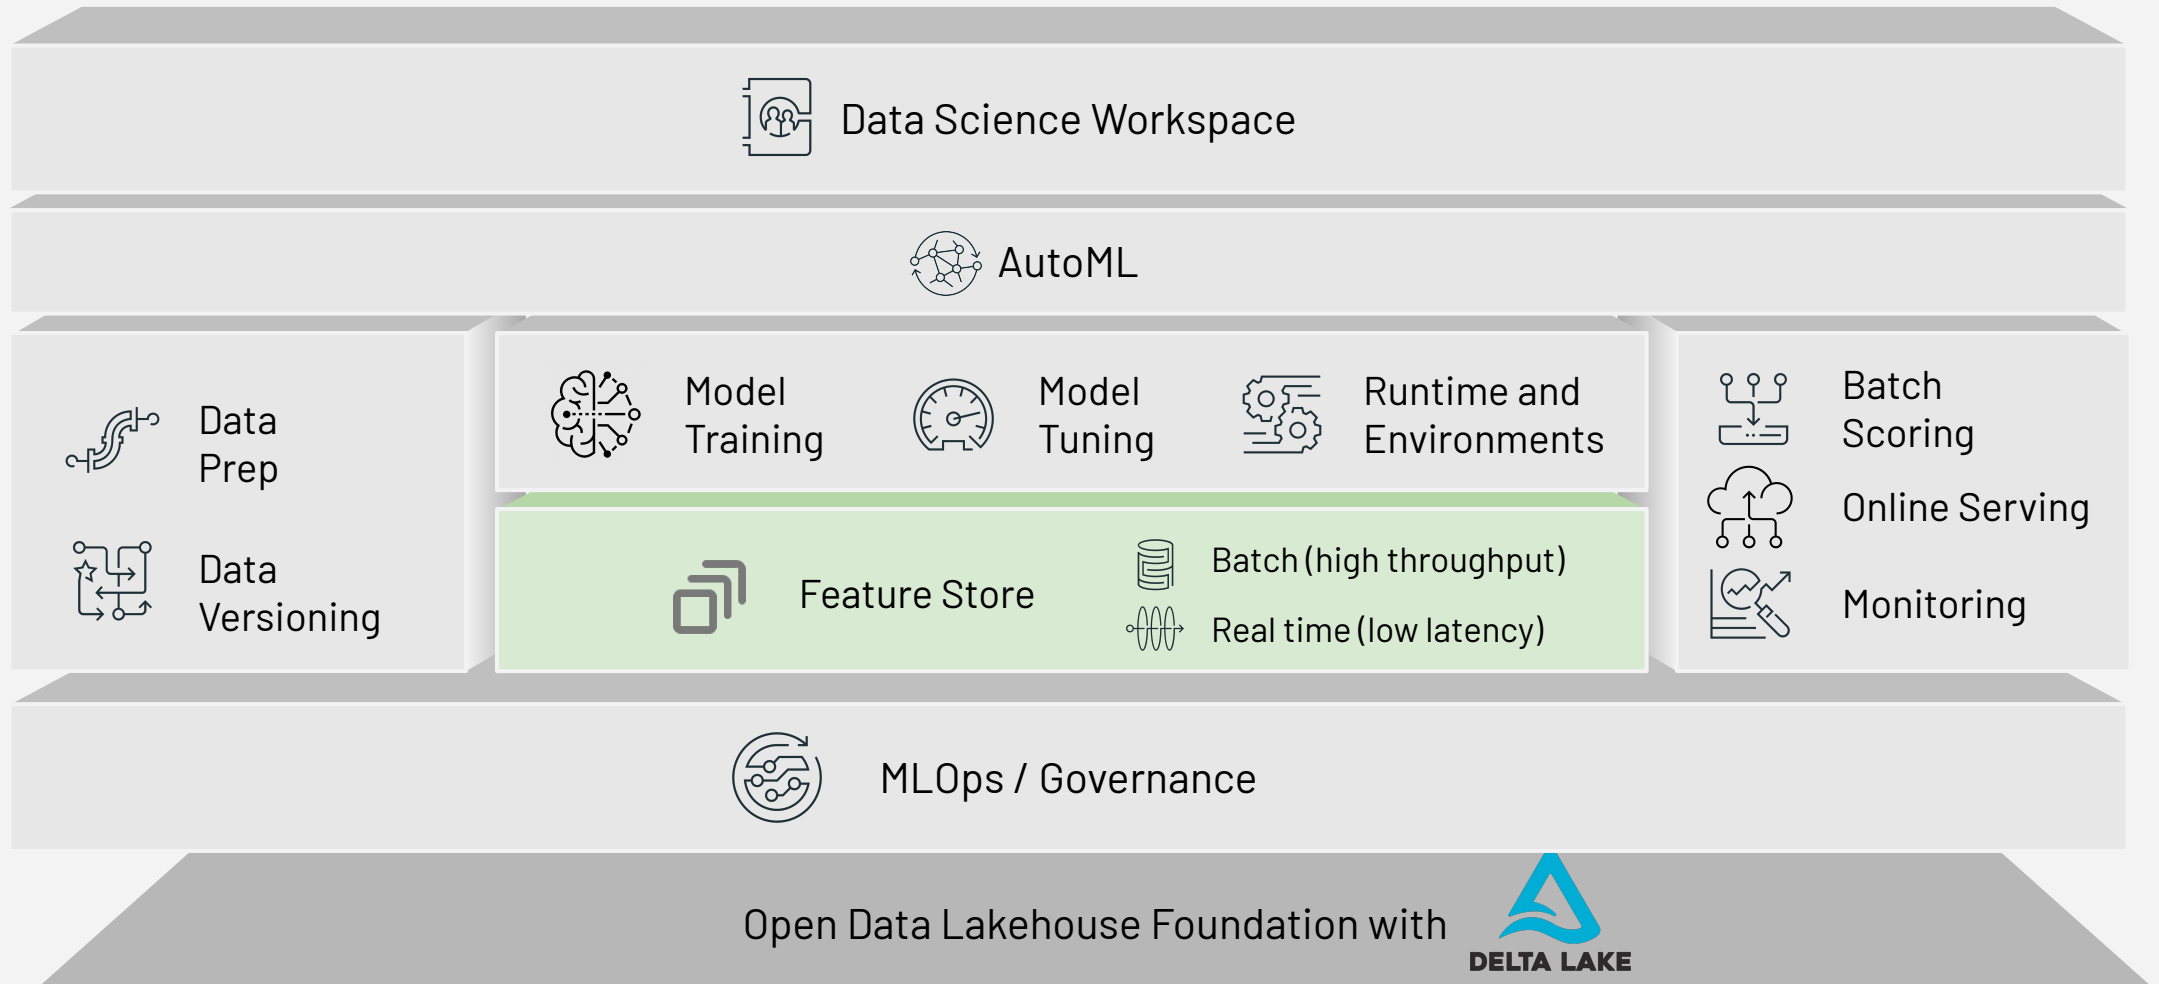

Lakehouse

A data-native and collaborative solution for the full ML lifecycle

Feature Store

The first Feature Store codesigned with a Data and MLOps Platform

What is a Feature?

A recommender model example

Raw - Data Origin

Users table

Zip code, Payment methods, etc.

Items table

Description, Category, etc.

Purchases

User ID, Item ID, Date, Quantity, Price

Types of Features

Transformations

e.g. Category Encoding

Context Features

e.g. Weekday

Feature Augmentation

e.g. Weather

Pre-computed Features

e.g. Purchases last 7, 14, 21 days

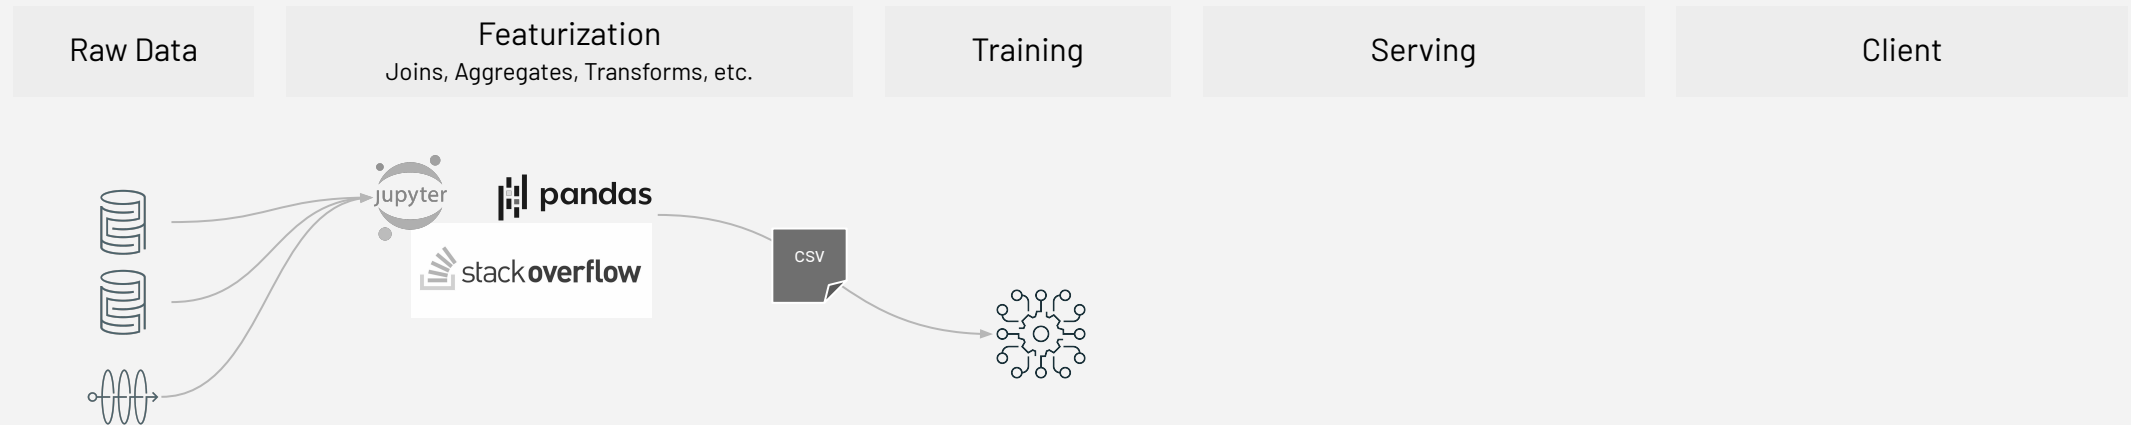

ML Model

Results

Item	$P(\text{purchase} \text{user})$
	0.58
	0.13
	0.12
	0.01

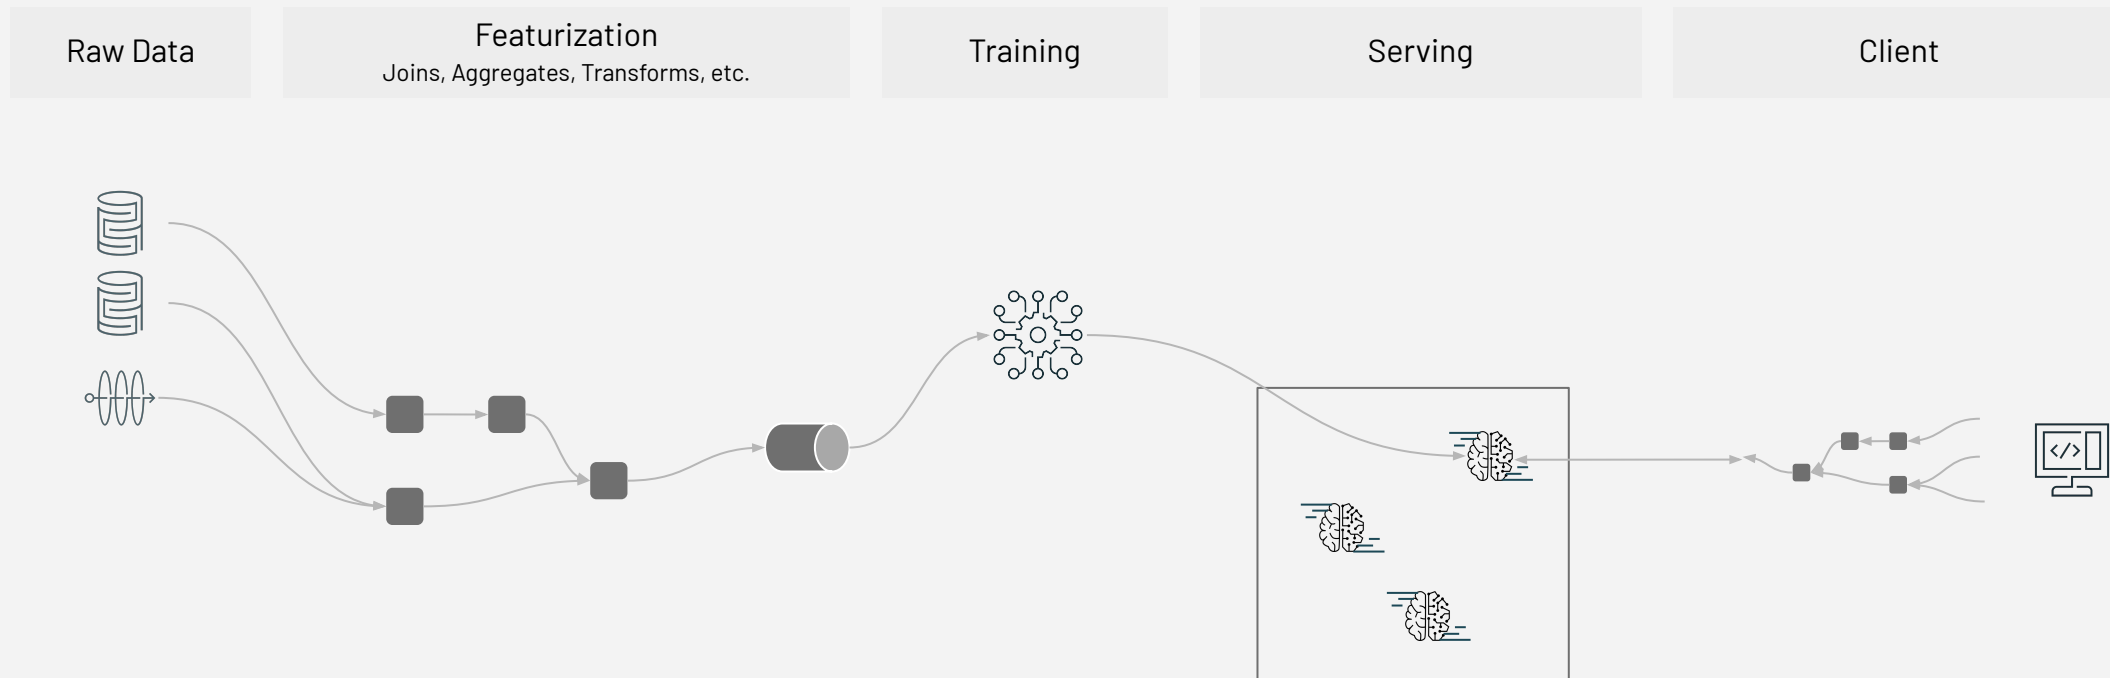

A day (or 6 months) in the life of an ML model

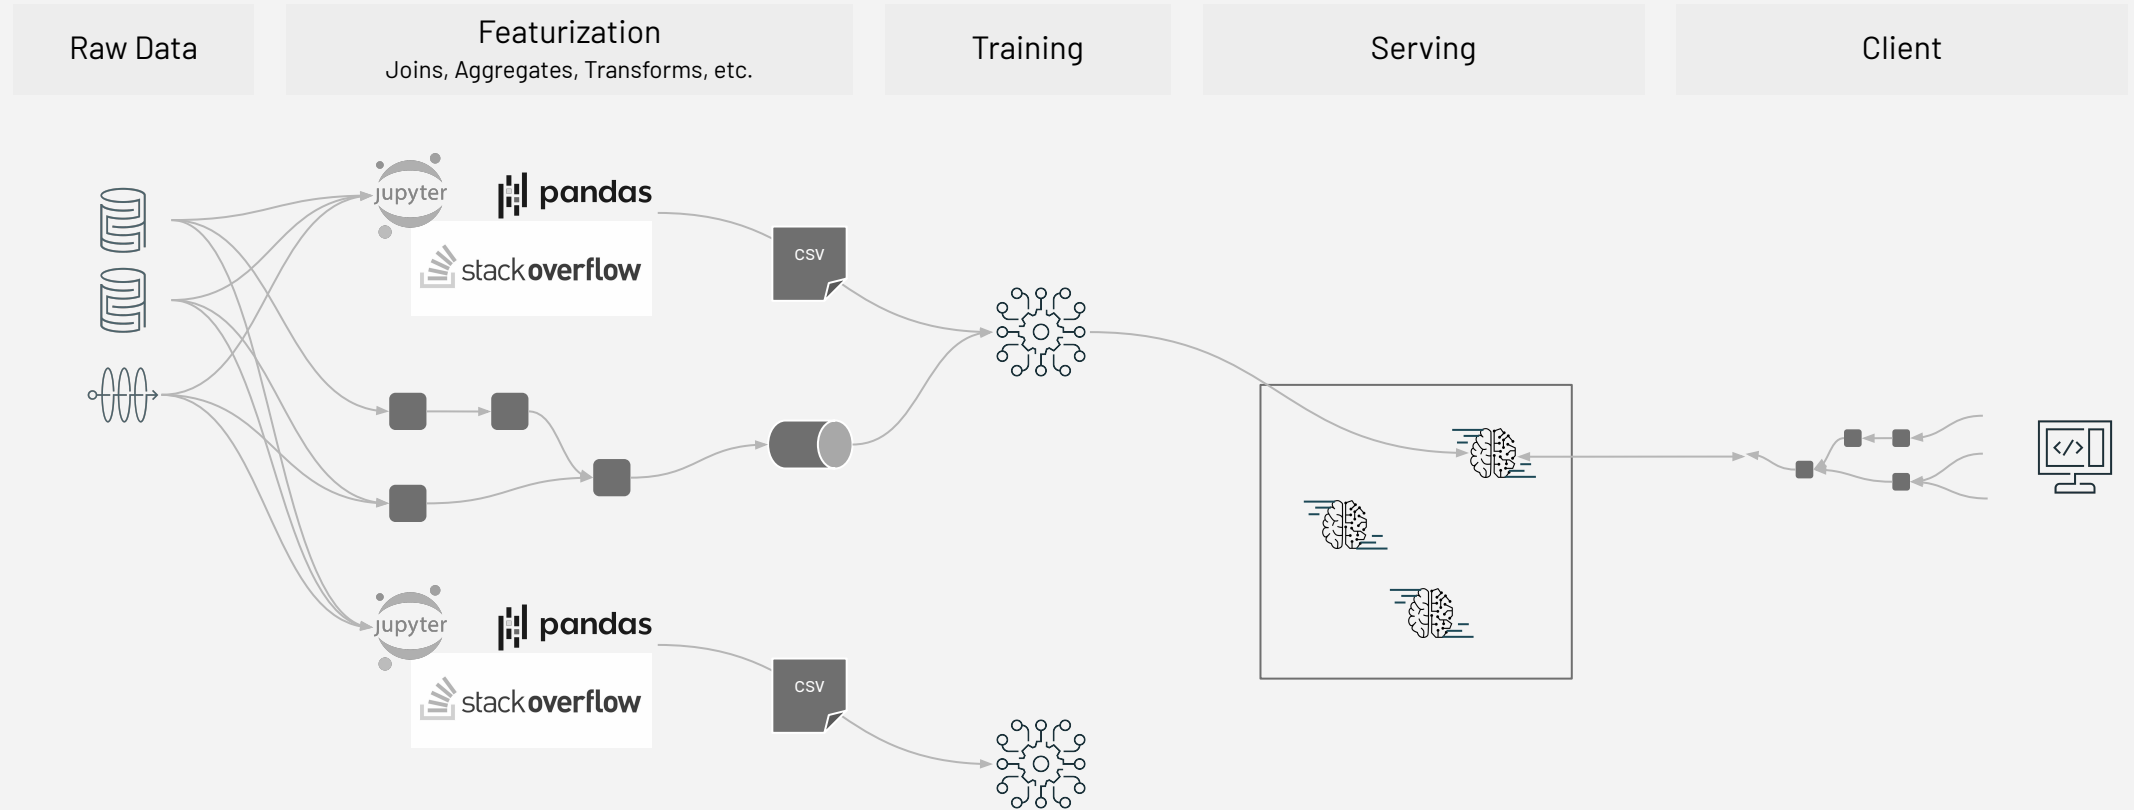

A day (or 6 months) in the life of an ML model

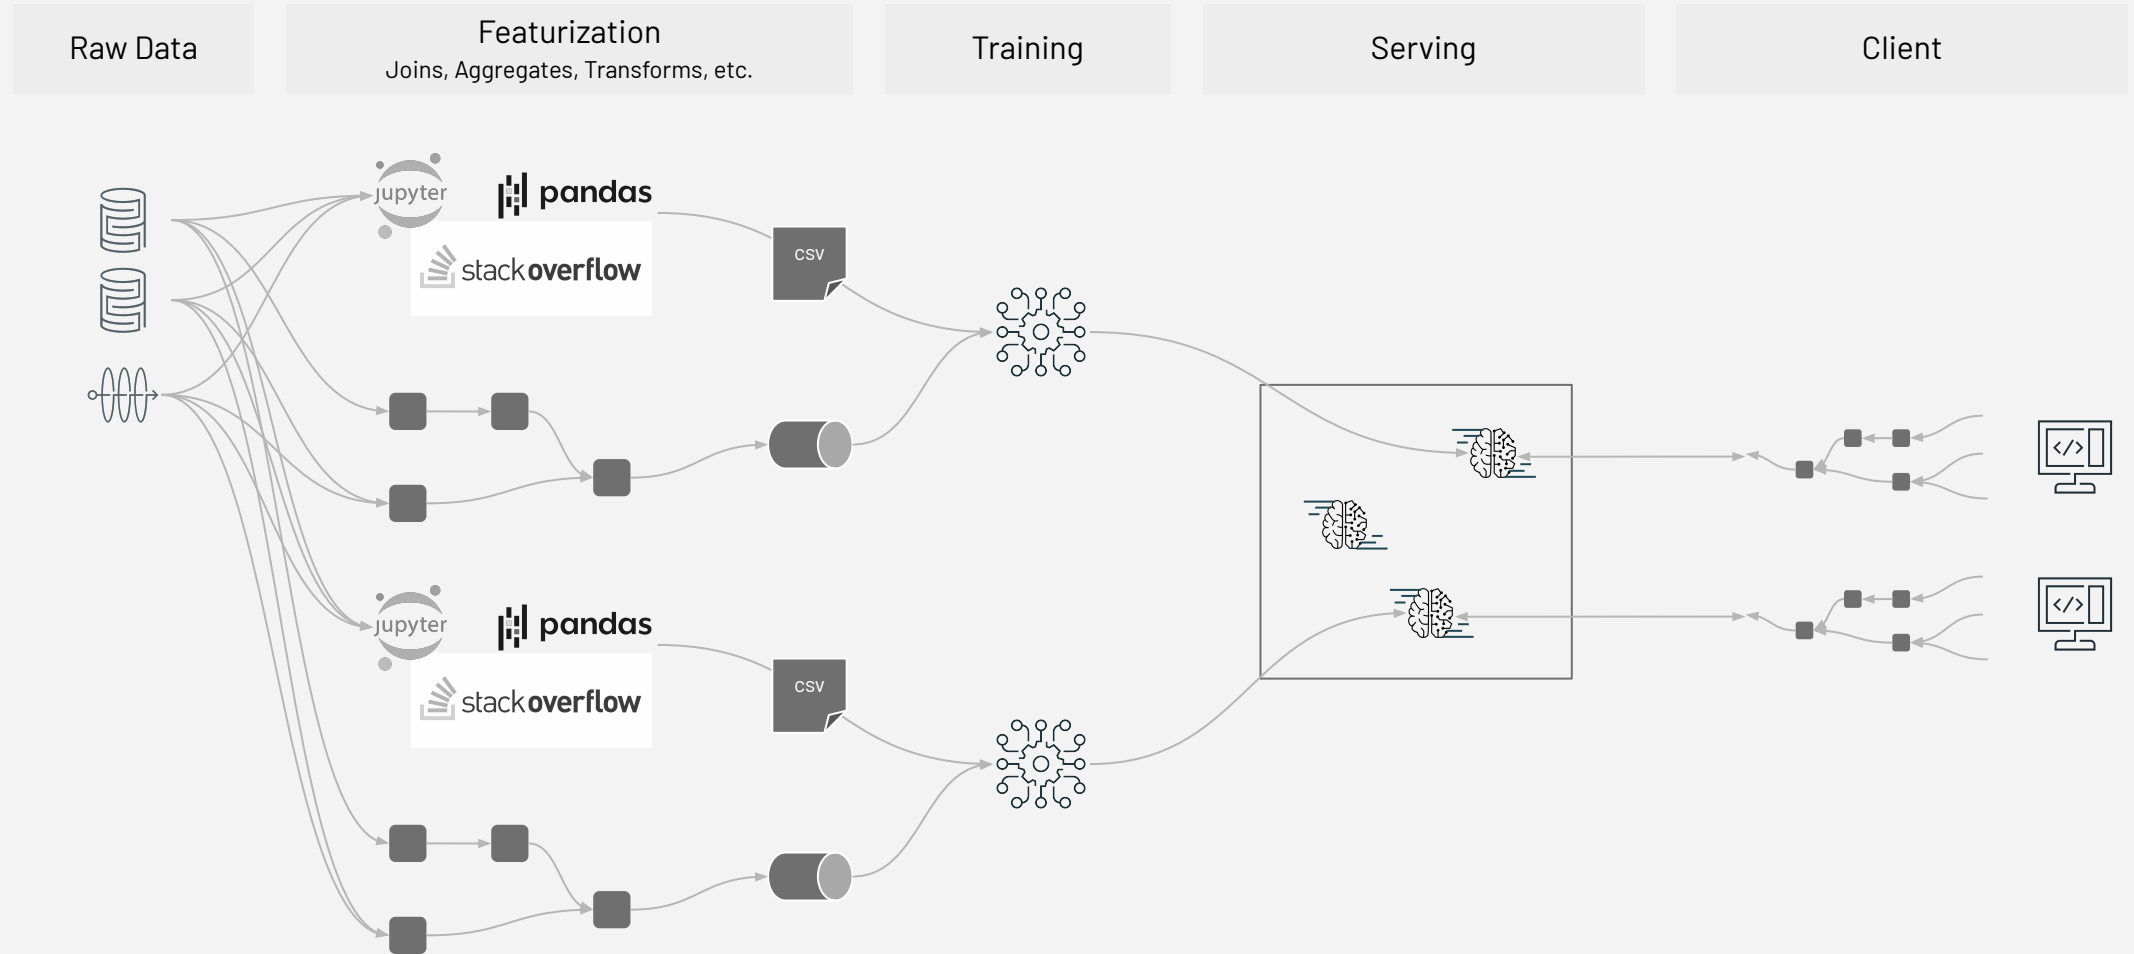

A day (or 6 months) in the life of an ML model

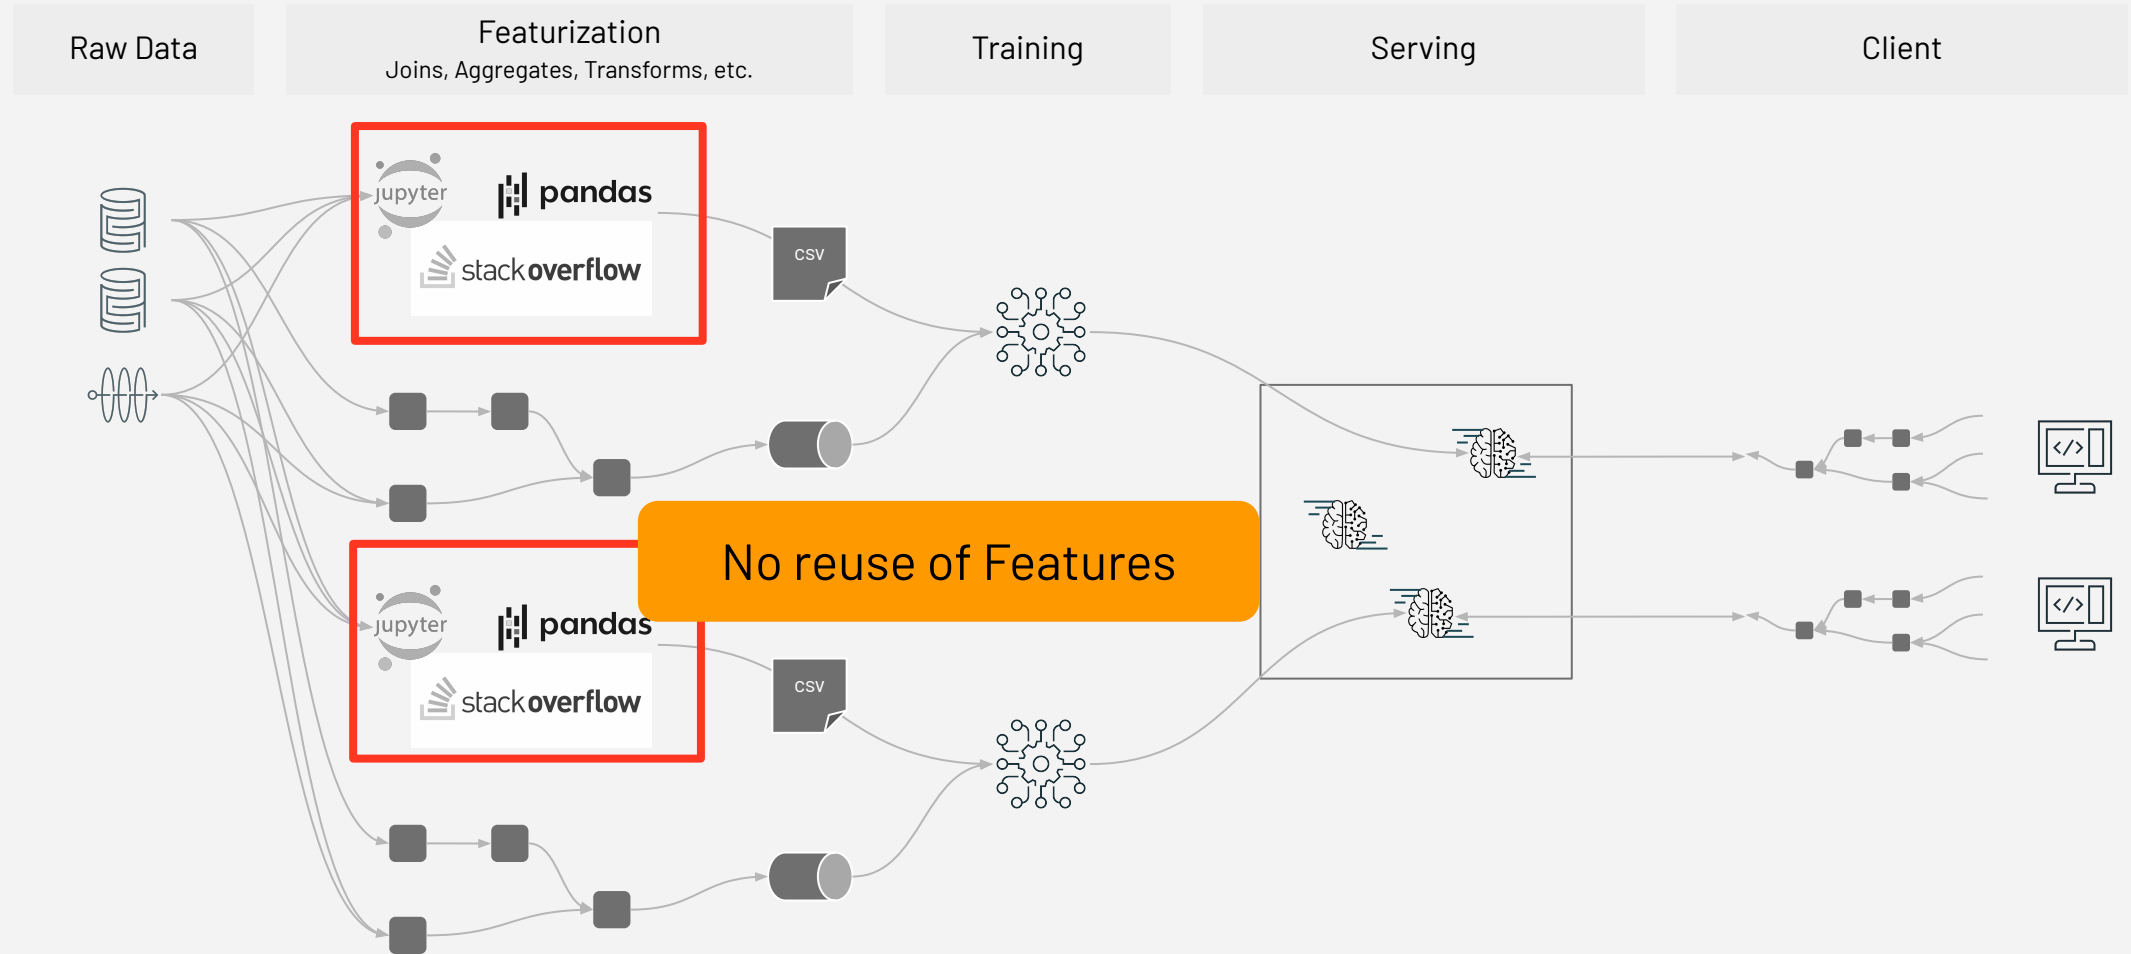

A day (or 6 months) in the life of an ML model

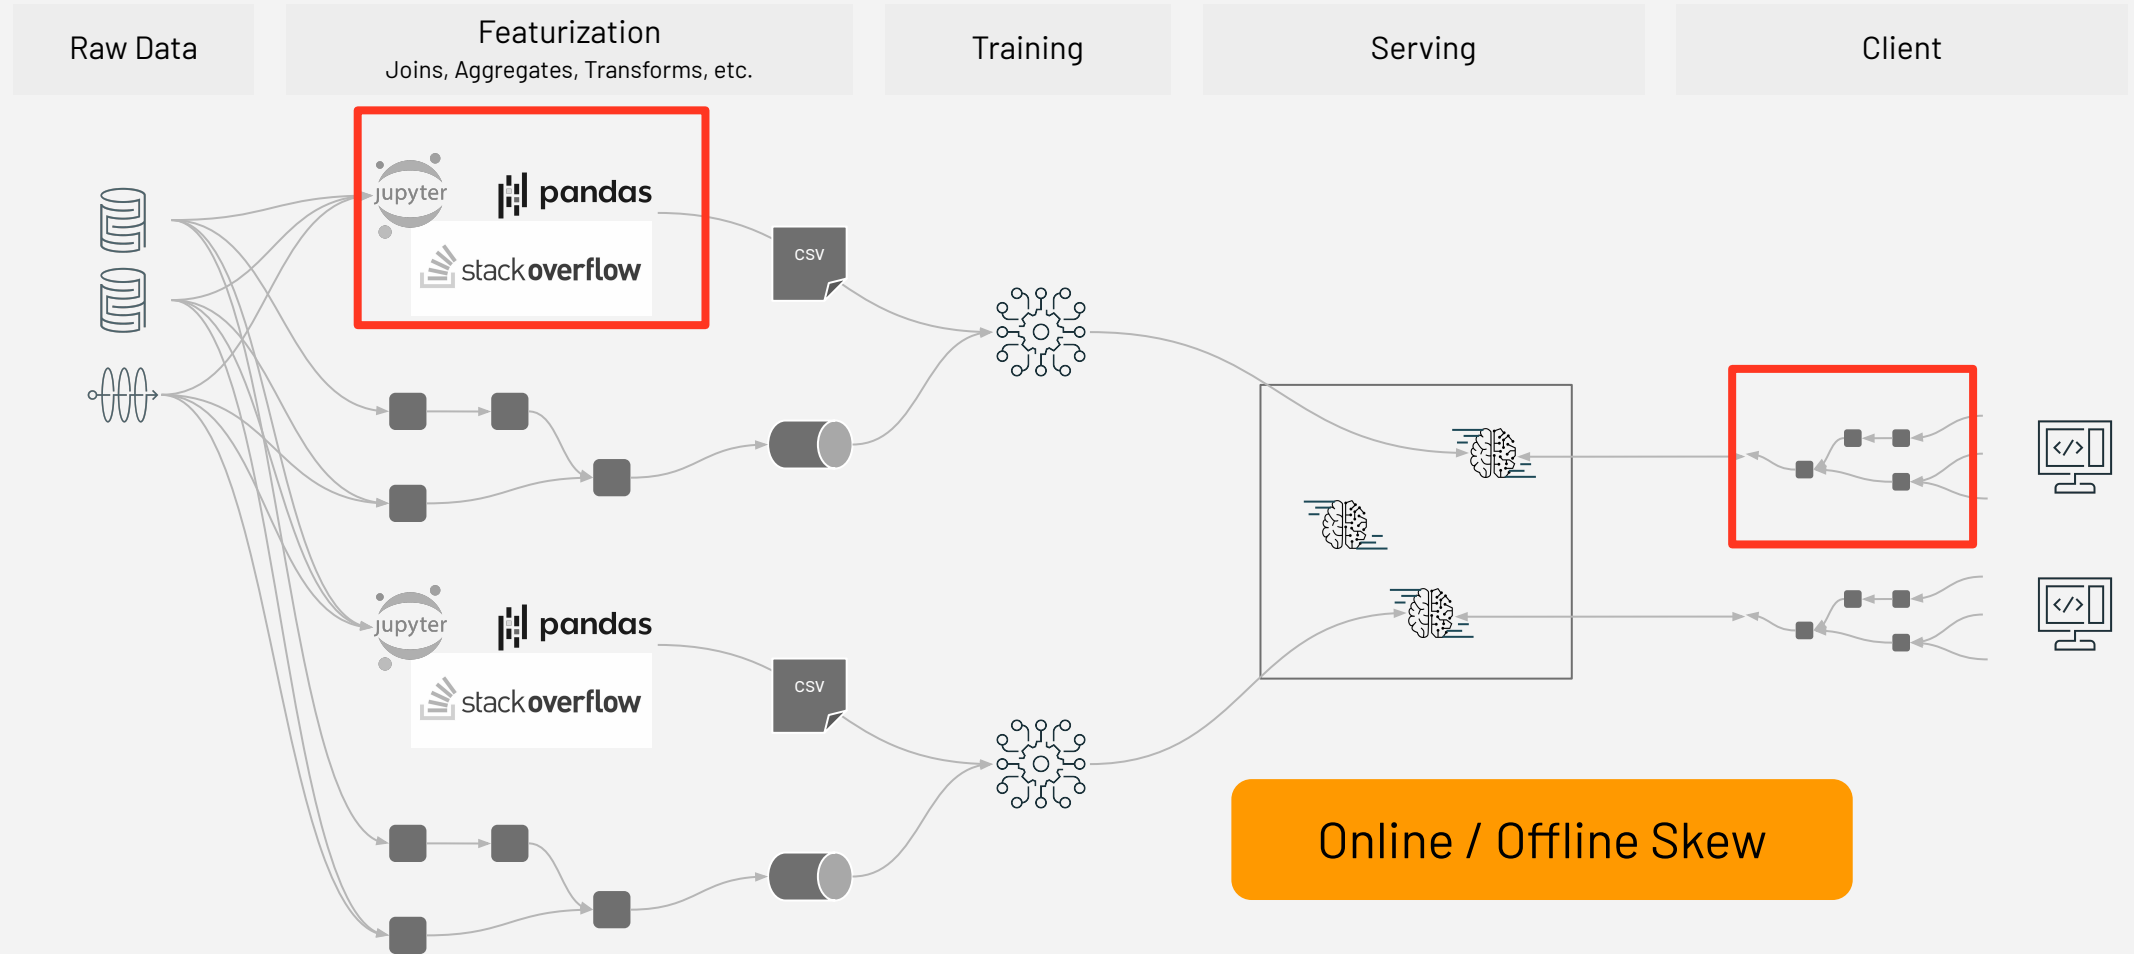

A day (or 6 months) in the life of an ML model

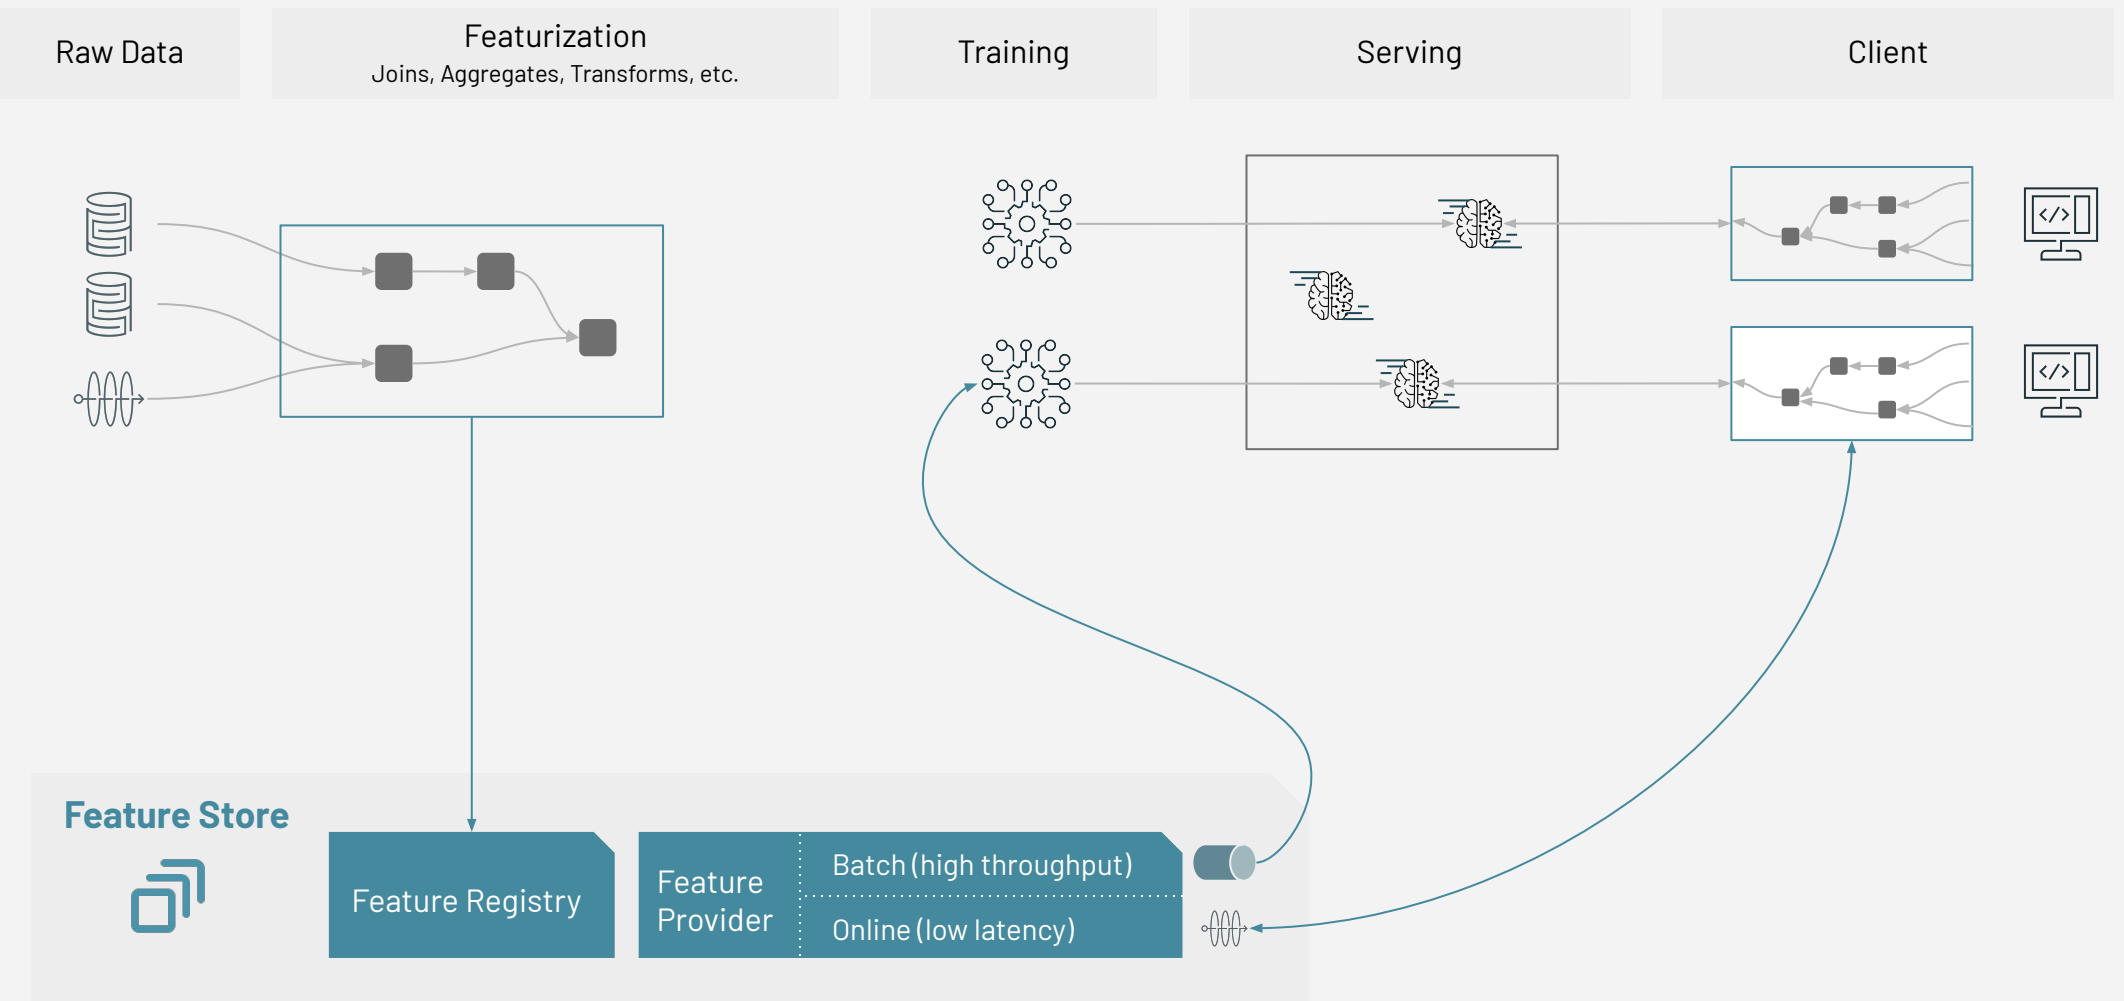

A day (or 6 months) in the life of an ML model

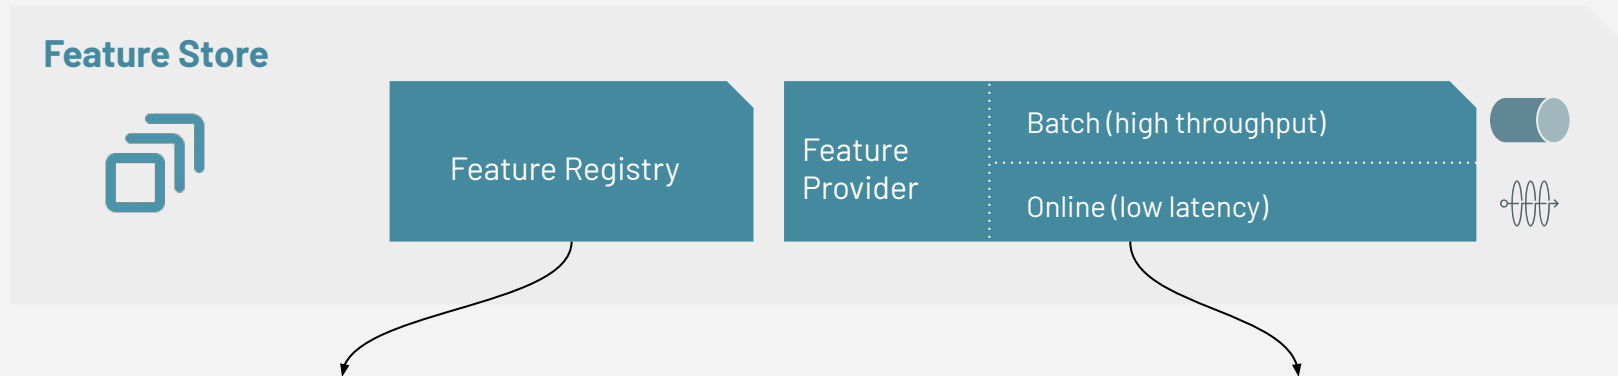

A day (or 6 months) in the life of an ML model

Solving the Feature Store Problem

Solving the Feature Store Problem

Feature Registry

- Discoverability and Reusability
- Versioning
- Upstream and downstream Lineage

Feature Provider

- Batch and online access to Features
- Feature lookup packaged with Models
- Simplified deployment process

Co-designed with  DELTA LAKE

- Open format
- Built-in data versioning and governance
- Native access through PySpark, SQL, etc.

Co-designed with  mlflow™

- Open model format that supports all ML frameworks
- Feature version and lookup logic hermetically logged with Model

"The Databricks Feature Store is the missing piece to our unified ML platform. It creates a marketplace for features, enabling us to quickly develop and deploy new models from existing features."

— Jorg Klein, ABN Amro

Feature Store - Architecture Overview

Feature Definition

- Flexibility in creating features
- Attributes can be created in the preferred language

Feature 1 Feature 2

`create_feature_table()`

`write_table()`

Feature Tables

- Able to retrieve Feature Tables with any language.
- ACLs, versioned and optimized for performance

Customer Features

...

Item Features

...

`create_training_set()`

`read_table()`

`publish_table()`

Training Set Creation

Batch Scoring
